**GENERAL HANDLING
COLD PROTECTION**

Acrylic/cotton/polyester
Latex coating

451 Thermo

Cold resistant

CHARACTERISTICS

- Seamless acrylic/cotton/polyester liner
- Latex coating
- Breathable back of the hand

DESCRIPTION

The acrylic/cotton/polyester liner provides effective protection against the cold. The natural rubber coating (latex) on the palm offers good resistance to tearing, puncturing and abrasion. The rough finish provides excellent grip on slippery surfaces. Because it is knitted without a seam and anatomically shaped, it fits onto the hand perfectly to provide absolute comfort and exceptional dexterity. The coating is confined to the palm and fingertips, leaving the back of the hand ventilated to limit perspiration. This warm and comfortable glove is ideal for all types of work in cold rooms or in cold weather. Can be washed at 40°C using a neutral detergent.
